Subject: Microsoft Settlement

To Renata B. Hesse or whom it may concern,
I want to register my concern and object to the proposed Microsoft settlement agreement.

I feel the agreement unfairly excludes from protection non-profit organizations. The internet is comprised of many not-for-profit companies that are producing product often seen as the major competition to Microsoft and the current wording would allow Microsoft to exclude these products from any form of interoperation. I am referring to many products that include Linux, Perl, Apache, Samba and more.

Thanks you,
Gary Palmer
